Designed with durability and performance in mind

Features and Benefits:

- 350lb load capacity enables you to build larger, heavier doors of up to 700lb.
- Made with pressed metal components, forged rivets and axels, to ensure product remains robust under load.
- Polymer wheels reduce noise and minimise track wear, guaranteeing system performance over time.
- Precision bearing components reduce operating force.
- Single bogey carriage ensures balanced load distribution which guarantees smooth panel operation.
- Retains structural integrity during and after installation which ensures product durability and longevity.
- Optional thrust bearing upgrade available for easier adjustment under load.

Sturdy design:

The 4600 Series is AAMA 906 certified for durability and performance and provides effortless panel operation over time.

Standard models available with:

- **Stainless steel** or **polymer** wheel material
- 1.57" and 1.81" wheel diameter
- 0.83" adjustment range

Housing variants, wheel sizes and attachments available upon request.
