

# TraXtar™ Duo

High performance  
on two wheels

Ideal for panels of  
up to 500lb.

Machined polymer  
wheels for superior durability  
and reliability

Suitable for existing  
rail profiles.

# Upgrade your existing 2-wheel systems

## Features and Benefits:

- 250lb weight capacity making it ideal for panel weights of up to 500lb.
- Corrosion proof housing with anti-corrosive adjusting mechanism make it ideal for corrosive environments.
- Modular design with customisable side spacers and mounting tabs make it adaptable to various systems.
- Fits within standard systems for easy upgrades.
- CNC machined wheels available in polymer or stainless steel for increased durability.
- Polymer wheels reduce track wear ensuring the product retains its performance over time, making it an ideal option for aluminium tracks.
- Sealed precision bearing components for reliability and reduced risk of corrosion.
- Single bogey carriage design ensures balanced load distribution guaranteeing smooth system operation.

## Product Options:

- Standard models available in **stainless steel** or **polymer** wheels
- 1.25" and 1.41" wheel diameters
- 0.49" adjustment range
- Custom spacers and mounting and mounting tabs available upon request

TraXtar™ Duo required operating force compared to:	Panel Weight (kg)		
	@100	@150	@200
<b>N9000 Series Roller</b>	51%	57%	59%
<b>Competitor A Roller</b>	24%	35%	37%
