KWIKfit™ is a registered trademark of Anthony Innovations Pty Ltd

Softening the close for your security door

Features and Benefits:

- Fits to most standard sliding security doors with minimal installation time
- Utilises existing fabricator standard lock punch tooling to create closing mechanism insertion point
- Non-intrusive mounting sits unseen within door extrusion
- Non handed mounting suitable for left- and right-handed configuration
- Accommodates various head tracks
- Soft close protects other hardware by reducing regular shock impact
- Greatly reduces noise when firmly closing the door
- Soft close to prevent injury to hands

Part of the KWIKfit™ product range

The KWIKfit™ Soft Closer works exclusively with our KWIKfit™ Coastal rollers to optimise the performance of your sliding security door.
