The roller in a league of its own

Features and Benefits:

- 1100lbs load capacity enables you to build larger, heavier doors of up to 2200lbs
- AAMA 906 certified for durability
- Thrust bearing for ease of adjustment
- Made with pressed metal components, forged rivets and axels to remain strong under load
- Polymer wheels reduce noise and minimise track wear, guaranteeing long-term system performance
- Retains structural integrity during and after installation which ensures product durability and longevity
- Stainless steel components for increased corrosion resistance
- Precision bearing components reduce operating force

Sturdy Design:

The GIANTQuad pushes the boundaries of sliding windows and doors. AAMA 906 certified for durability, it provides effortless panel operation whilst bearing maximum load capacity.

Standard models available with:

- **Stainless steel** or **polymer** wheel variations
- 3" wheel diameter
- 1.10" adjustment range
