Balanced load guarantees a smooth slide

Features and Benefits:

- 275lbs load capacity enables you to build doors of up to 550lbs
- End adjustable to suit existing rail profiles
- Available in plated mild steel and chrome steel bearing options
- Polymer wheels reduce noise and minimise track wear, guaranteeing system performance over time
- Precision bearing components reduce operating force
- Single bogie carriage ensures balanced load distribution which guarantees smooth system operation
- Retains structural integrity during and after installation which ensures product durability and longevity
- Wheels are fully retractable within the assembly for ease of panel installation

Reduced Rolling Resistance:

The 5000 Series is AAMA 906 certified for durability and performance and provides effortless panel operation over time.

Standard models available with:

- **Stainless steel** or **polymer** CNC engineered wheels
- 1.1", 1.25" and 1.4" wheel diameter
- 0.55" adjustment range

Other mounting tab variants, wheel sizes and spacer attachments available upon request.
